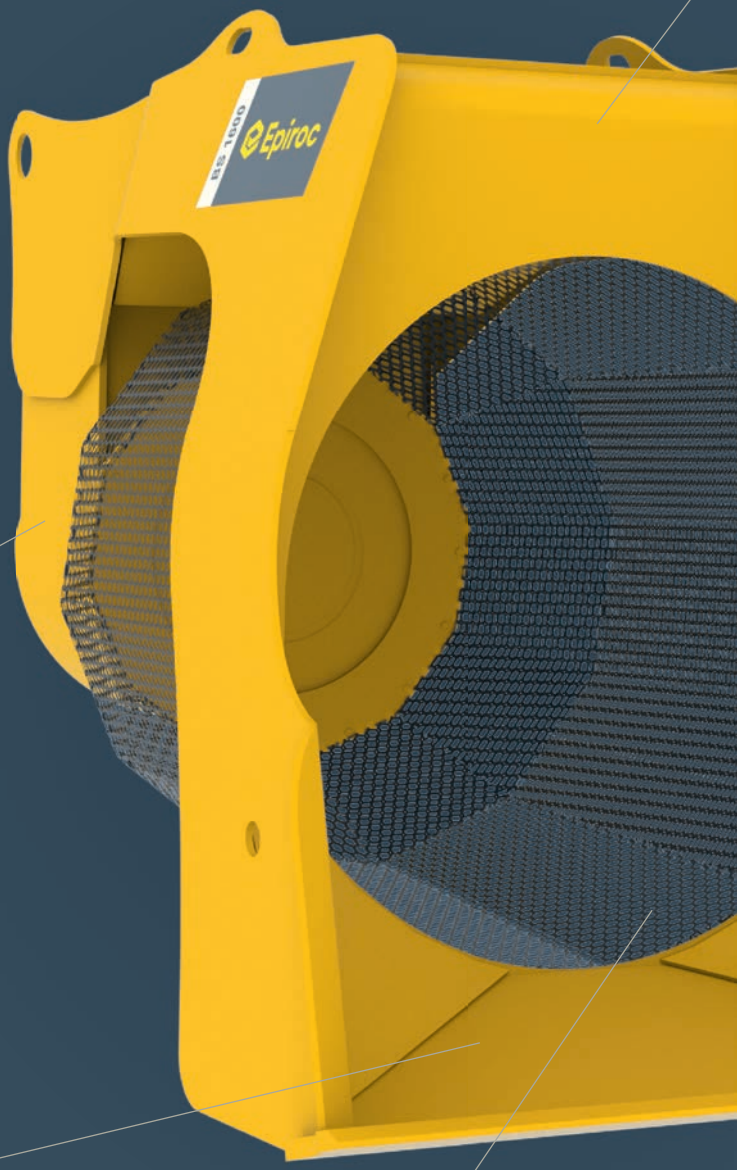
Sort it out on-site

Sort and separate rocks, crushed concrete and recycling material with speed and precision using our high-performance Bucket Screeners.

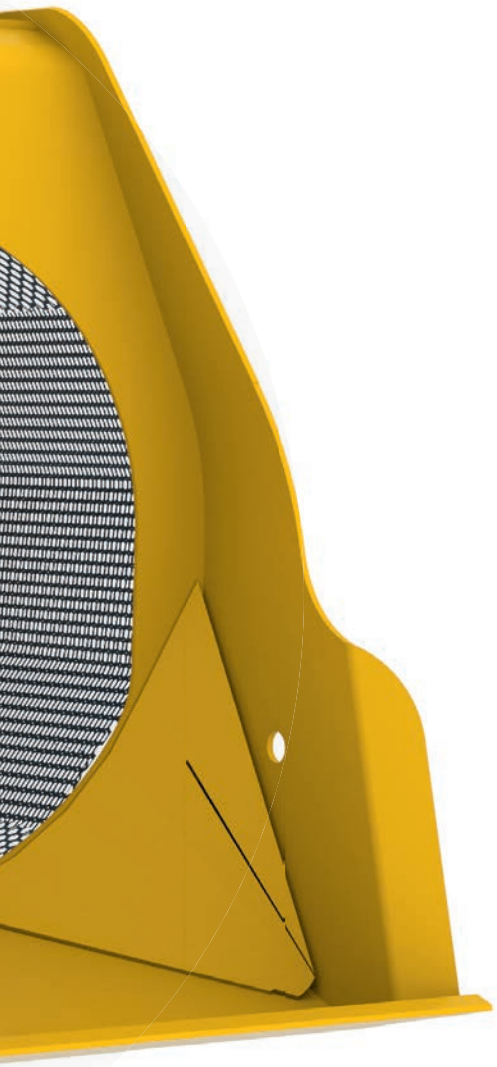


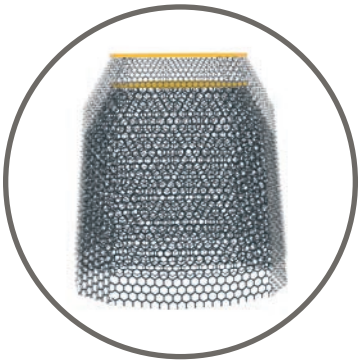
The internal **timing belt transmission**, driven by a powerful hydraulic motor, allows the use of a **large main roller bearing** and optimizes productivity.

The large hopper capacity enables maximum intake and thus a constant feeding with material.

Extra large dodecagonal baskets and **hexagonal profile of the screening mesh** enables efficient material screening.

The use of **special wear resistant steel** guarantees highest durability even under the harshest conditions





Stackable screening baskets with different mesh sizes: 20/30/40/50/60 and 80 mm
